

LSU FOOTBALL × DIGITAL TWIN STUDIOS

SATURDAY NIGHT. EVERY NIGHT.

THE DEATH VALLEY EXPERIENCE

A digital twin of the LSU gameday recruiting journey. Explorable before recruits arrive, alive while they are here, working after they leave.

THE OPPORTUNITY

THE BIGGEST ROOM IN RECRUITING.

Gameday. One night. Then it's gone.

30+

RECRUITS EXPECTED

for the Clemson opener alone, Sept 5, with College GameDay on site

7

HOME GAMES

seven recruiting cohorts moving through the same journey this season

1

SCRIPTED JOURNEY

your staff already wrote it: Lot 414 to Tailgate to Tiger Walk to kickoff

Home openers have drawn headline visitor lists for years. Recruits now schedule visits around marquee games specifically to judge the environment. The environment is the pitch.

THE IDEA

MAKE IT LAST.

One immersive twin of the full gameday journey. It works on the recruit at three moments.

BEFORE

They arrive already home

A secure link days out. The family walks every step: parking, Tailgate, Tiger Walk, kickoff. Guided by your staff.

DURING

Death Valley in their hands

Interactive displays in the Operations Facility and Lawton Room, on facility network, immune to gameday cell congestion.

AFTER

The visit that keeps visiting

The follow up link brings the night back for weeks. Analytics show who returned, and how often, while they decide.

Your gameday video stays yours. The twin is the vessel that carries it further.

THE JOURNEY

TEN STOPS. ONE STORY.

1 Lot 414 • River Road arrival

2 Charter bus to the facility

3 Football Operations Facility

4 Tiger Tailgate • indoors

5 Registration

6 Tiger Walk

7 Lawton Room

8 Field level warmups

9 Kickoff • Death Valley

10 Postgame • buses at Matherne's

STYLIZED AERIAL MAP — WORKING CONCEPT

Numbered stops on a designed campus aerial. Tap a stop, drop into a photoreal ground level walkthrough.

The exact route your script describes, in the exact order your staff wrote it.

MOMENT ONE • BEFORE ARRIVAL

THEY LAND KNOWING THE WAY.

Secure link, days ahead

Recruit and family receive the experience with the visit itinerary.

Walk it before they walk it

Aerial map into photoreal walkthroughs of every stop on the route.

Guided by your people

Recruiting staff avatars narrate each stop in their own voices.

Parents come too

A family that cannot travel still walks every step of their kid's day.

PHOTO • THE BRAND

Recruit and family, phone in hand, Tiger Stadium behind

Drop in: official visit arrival photography, night exterior

MOMENT TWO • ON GAMEDAY

ALIVE INSIDE THE BUILDING.

PHOTO • THE BRAND

Lawton Room • recruits at an interactive display

Drop in: Lawton Room interior, gameday dressed

Hardwired kiosks

Operations Facility and Lawton Room displays run on facility network. Gameday cell congestion never touches them.

Screens inside screens

Monitors captured in the twin become live content surfaces. Archival hype today, opponent week content tomorrow.

Swap content, not scans

Every screen updates per game week with zero recapture. The build stays evergreen.

MOMENT THREE • AFTER THE GAME

THE FOLLOW UP THAT FOLLOWS THROUGH.

In every follow up

Staff sends the twin with standard post visit communication. The night comes back on demand.

The family decides together

Grandparents, coaches, siblings: everyone influencing the decision walks Death Valley.

Interest becomes visible

Analytics show who opened it, what they lingered on, who came back. A quiet, continuous read no video view count gives you.

WHAT THE STAFF SEES

OPENED

Which recruits engaged, on what device

RETURNED

Who came back after the visit, and how often

LINGERED

Which stops held attention: the locker of the facility tour or the tunnel

THE GUIDES

YOUR STAFF. THEIR VOICES. FOREVER CURRENT.

PHOTO • THE BRAND

Recruiting staff portraits • the six script voices

Drop in: staff headshots from lsusports.net rosters

Two minutes each

A brief reference capture per staff member creates a broadcast quality digital avatar. Piggybacks on any talent session already planned.

Edit the script, not the shoot

Lot number changes? New Tailgate feature? Regenerate the narration from an edited script. No reassembly, no reshoot, ever.

Best in class, verified

Independent 2026 testing places HeyGen first on avatar realism, voice cloning, and interactivity. Synthesia and D-ID evaluated and declined.

A conversation, eventually

Interactive avatars open a future phase: a recruit at a kiosk asks a question, the guide answers in real time.

THE BUILD

THREE PROVEN PLATFORMS. ONE BUILD.

MATTERPORT PRO3

Industry standard LiDAR spatial capture. Photoreal walkthroughs of every zone, indoors and out, captured once, evergreen for seasons.

TREEDIS

The experience layer: guided tours, media overlays on real screens, access control, analytics, kiosk delivery, VR. No code, fully editable.

HEYGEN

Avatar guides from your staff's likeness and voice. Narration regenerates from script edits. Interactive avatars on the roadmap.

ONE BUILD, THREE DOORS Secure web link to every recruit • hardwired kiosks in the facility • Meta Quest VR for presentations. Same twin, no extra production.

LOCKED DOWN BY DESIGN.

SCAN SWEEP PROTOCOL

Athletics walks every space before capture. Monitors dark, boards cleared, escort signs off per zone. Locker room and staff offices never scanned.

RECRUITS ONLY

Password protected, expiring links. Audience level permissions. Access analytics flag anything unusual. Nothing public, ever.

NOTHING THEY DON'T ALREADY SEE

The twin contains only what a recruit sees on a physical visit. Full compliance review welcome at any point.

LSU OWNS THE DATA

DTS manages the platform accounts on LSU's behalf. LSU may assume ownership of accounts and all spatial data at any time. Answered before it's asked.

Built for an athletic department, not adapted to one.

THE CLOCK

LIVE FOR THE CLEMSON COHORT.

If any approval outpaces the opener, the twin launches with professional voiceover and avatars arrive at the next home game as a planned upgrade. The schedule bends; it doesn't break.

THE INVESTMENT

ONE BUILD. SEVEN COHORTS THIS SEASON.

BUILD ONCE

\$39K–\$67K

Capture • aerial map • experience assembly • avatars • releases • PM • contingency. Planning range pending vendor quotes.

SUSTAIN ANNUALLY (YR 2+)

\$16K–\$32K

Platform licenses plus the renewal retainer: narration regenerated, screens refreshed, targeted rescans. The asset never goes stale.

Kiosk hardware scoped separately with Athletics IT. Not required for launch.

Every future season is an edit, not a production.

FOUR YESES. THIS WEEK.

ACCESS

1

Capture windows: Operations Facility, Lawton Room, stadium vantages. Plus a second operational contact for the season.

RELEASES

2

Talent releases out for signature; confirm the six speaking roles; two minute HeyGen session rides any planned talent shoot.

ARCHIVAL

3

Approve footage for the twin's screens. The Brand's library, The Brand's call.

GREENLIGHT

4

Approve the build envelope. Capture starts on approval; the opener cohort is the target.

GEAUX.
